DD-101 Series products---

Dab

Cleaning solution

AUTOMOTIVE PARTS – Soak in a container filled with solution. Wipe or brush clean.

BATHTUBS MAT – Spray both sides with solution. Let sit 30 seconds. Agitate with stiff brush or terry cloth rag. Rinse.

BATHTUBS – Sponge on or spray solution on all surfaces. Let sit at least 30 seconds. Scrub or wipe clean and rinse thoroughly. Great on soap scum!

BATHROOMS – DD-101 Dab can be used for every corner of your bathroom!

BEACH TAR – Spray directly on tar. Rub with fingers. Rinse off with ocean water! At home, use an old rag or paper towel to wipe tar off feet, shoes or other surfaces after spraying with DD-101 Dab. An aerating foamer pump dispenser is a great idea for the car. Don't leave for the beach without it!

BEVERAGE STAINS – Follow stain protocol: Use one paper towel behind stain. Wet stain lightly with water (choose the water source with the least amount of minerals.) Spray solution on second paper towel. Dab carefully directly on the stain. Follow with more water and a clean paper towel. Do not rub – press to remove excess water and lift stain from material.

BLOOD stains – Use solution from a spray bottle or an aerating foamer pump dispenser on blood spots. Leave soaking or agitate with brush and rinse. Overnight soaking does wonders on larger spots. For mattresses, upholstery, and carpet, pump foam on spot and allow time for the micelle molecules to lift the stain off the surface.

BRONZE – Spray cloth with solution. Wipe item with damp cloth. Dry thoroughly.

BUG BITES – Use a poultice made with DD-101 Dab. Breaks up the toxic venom from mosquitos, wasps, bees, spiders, etc.

BUG STAINS – Spray the stain. Let sit for 30 seconds and then wipe it with a wet cloth.

CLOSETS – Spray shelves, walls, floors and wipe. Leaving a residue of DD-101 solution in corners and crevices helps deter bugs.

FACES – DD-101 is the soap of preference for the hypoallergenic, chemically sensitive, and health-conscious individual alike.

FISH ODOR – Spray area, allow to sit for 25 minutes, wipe and rinse thoroughly.

FURNITURE REFINISHING – To remove varnish or paint, apply Dab solution. Let sit 30 minutes or longer. Wipe with a wet terry cloth or brush. You may need to use a fine grade steel wool to get into crevices. As with any paint or varnish remover, multiple applications may be necessary.

This non-fuming, non-chemical or solvent method makes it possible for even the most chemically sensitive individual to get creative with furniture and antiques.

INK – Spray on stain (will not remove some "set-in" stains if previously laundered). Rub vigorously. Wash according to LAUNDRY directions.

JEWELRY – Soak jewelry overnight; use a soft brush if necessary. Rinse and dry. Or, spray with DD-101 Dab, brush with a soft brush, rinse and dry. Not recommended for opals and pearls.

LAUNDRY –Pre-treat spots and stains with Dab solution sprayed directly on spot. Agitate by rubbing fabric together or use a brush. Soaking also helps lift dirt and stains.

LIPSTICK – Can be removed from carpet and clothes by spraying on DD-101 Dab. Wipe with a damp towel. Work into the stain and remove with a damp cloth. If the stain is on clothing, launder as usual.

PERMANENT MARKER STAINS – Spray on stain (will not remove some "set-in" stains if previously laundered). Rub vigorously. Wash according to LAUNDRY directions.

POISON IVY – Spray on and rub into affected area on skin. DD-101 DAB dissolves the toxic oil from the plant and reduces the chance of irritation and rash.

SPOTS & STAINS – See instructions for specific stains (rust, blood, ink, etc.) and surfaces (fabric, wood, tile, etc.). Follow stain protocol: Use one paper towel behind stain. Wet stain lightly with water (choose the water source with the least amount of minerals.) Spray solution on a second paper towel. Dab carefully directly on the stain. Follow with more water and a clean paper towel. Do not rub. Press to remove excess water and lift stain from material.

TAR – We challenge you to find a better tar remover – toxic or not! Spray, scrub with damp cloth or stiff brush and rinse.

TEETH – Spray directly onto toothbrush (with or without toothpaste), or mist your toothbrush with a fine spray. Brush as usual. Optional: Add a few drops of food grade essential oil of peppermint or cinnamon for a fresh taste. Show off your white teeth!

WOUNDS – Wounds and cuts should always be washed thoroughly with soap and water. DD-101 Dab is the finest, purest soap for such purposes and can be used with poultices.

DD-101 HELPS REDUCE YOUR RISK OF BECOMING CHEMICALLY SENSITIVE!

People are becoming chemically sensitive in epidemic proportions, silently, daily, one toxic exposure at a time. The most common reason people become chemically sensitive is because of the daily, bit by bit accumulation of toxins in the body.

Toxins are absorbed through the skin, inhaled in through the lungs and ingested through the food we eat (most processed foods, meats and produce have pesticides, fluoride, dioxins and other environmental contaminants.)

While we can't control many of these chemical exposures, we can control a major source: the common household cleaning products and personal care products that can be replaced by DD-101. It is that simple. Start reducing your risk today by getting to know what products are most toxic in your home.

Household cleaners and detergents marked with the "signal" words: "Caution", "Warning" or "Danger" are legally defined as poisonous. These three words are legal markers mandated by the EPA to appear on the label, and mean that a product is lethal enough to kill an adult 180-pound male in certain specific amounts. They replaced the familiar but no longer seen Skull & Crossbones symbol that was formerly used to designate lethal poisons:

CAUTION: An ounce to a pint could be FATAL to an adult if ingested.

WARNING: A teaspoon to an ounce could be FATAL to an adult if ingested.

DANGER: A taste to a teaspoon could be FATAL to an adult if ingested.

DD-101 IS THE ULTIMATE SOLUTION FOR POISON SAFETY!

Children cannot read these words of warning! Their bodies also cannot handle what an adult body can handle. Using DD-101, you can replace harmful household products, effectively eliminating risk of accidental poisonings and inhalant abuse.

You have an urgent responsibility to protect your children and teenagers from poisons, and not just from accidental poisonings and misuse of toxins Equally devastating is the unintentional brain, organ and tissue damage from continuous exposure to common household chemicals – ranging from learning difficulties, inability to concentrate and numerous allergic reactions all the way up to permanent Multiple Chemical Sensitivity.

Don't just try to hide poisons from your curious toddler or teenager. REMOVE THEM! It can't happen in your home if there aren't any poisons available for them to get into. DD-101 cleans so well and is so versatile that you will no longer need to worry about poisons in your home

It's a dirty world. Let's clean it up!!!
